## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. **Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor (6,254,642) in view of Hasson (5,658,272).** Taylor discloses a device having an evacuator (52, see figures 7-10) capable of reducing the stomach and a fastener (11). The fastener is applied using a pusher (55). However, Taylor does not disclose an expandable structure that the evacuator extends through. Attention is drawn to Hasson reference, which teaches the use of an expandable member (34, see figure 7) to be inflated to prevent premature withdrawal of the surgical instrument before the operation is completed (see column 4, lines 41-44). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include the expandable member of Hasson with the device of Taylor to prevent premature withdrawal of the surgical instrument.

### ***Response to Arguments***

3. Applicant's arguments filed 6/22/2009 have been fully considered but they are not persuasive. Applicant argues the combination of Taylor and Hasson fails to disclose the evacuator deflating the stomach while the expandable structure is inflated. However, this is merely a functional limitation, and Examiner takes the position that the

device of Taylor as modified by Hasson is capable of performing this function.

Examiner can find no evidence to show this function is not capable of being performed.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

5. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
